CAREER OBJECTIVE

Computer Science undergraduate skilled in Java, Python, JavaScript, HTML5, and CSS3, with experience in frontend development, UI/UX design, and manual and automation software testing (Selenium, TestNG/JUnit). A quick learner with strong analytical skills, seeking a Software Development/QA Engineer role .

EDUCATION

KGiSL Institute of Technology | Coimbatore, India | Aug 2023 – Jun 2027

Bachelor of Engineering in Computer Science | CGPA: **8.01**

Coursework: Data Structures, Algorithms, DBMS, Computer Networks, OS, Machine Learning, Data Warehousing

EXPERIENCE

Full Stack Developer Intern — StaxTech | Aug 2024 – Jun 2025

- Designed and developed full-stack web applications using React.js on the frontend and Node.js with Express.js on the backend.
- Built and integrated RESTful APIs to connect React components with MongoDB and MySQL databases efficiently.
- Collaborated with team members to gather requirements, design component architecture, and deliver user-centric solutions.
- Applied debugging and performance optimisation techniques to improve rendering speed and API response times.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript.

Frontend Technologies: React.js, HTML5, CSS3, JavaScript.

Databases: MongoDB (Mongoose), MySQL

Software Testing: Manual Testing (Test Cases, JIRA), Automation Testing (Selenium, TestNG/JUnit)

Dev Tools & Platforms: Git, GitHub, Visual Studio Code.

UI/UX Tools: Figma, Adobe XD, Wireframing, Prototyping

PROJECTS

Symposium Event Management System *React.js, Node.js, Express.js, MongoDB, JavaScript*

- Built a full-stack event management platform with structured data models for registrations, schedules, and participant records, reducing manual registration effort by 80%.
- Designed database schema and implemented CRUD operations and queries to manage and retrieve event data efficiently.

Language Translator System *Python, Node.js, Express.js, React.js*

- Built a Python-based language translation system supporting 10+ languages with 90% translation accuracy using NLP libraries.
- implemented data preprocessing and text-cleaning pipelines (tokenization, normalization) to improve data quality and model accuracy

RELEVANT KNOWLEDGE AREAS

Java & Object-Oriented Programming: OOP concepts, Collections Framework, Exception Handling, File Handling, Multithreading, JDBC.

Data Structures & Algorithms: Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Sorting & Searching, Time Complexity Analysis.

Software Testing & QA: Manual test case design and bug tracking (JIRA); automation testing with Selenium, TestNG/JUnit; Postman for API testing.

SOFT SKILLS

- Analytical Thinking & Problem Solving
- Effective Communication & Team Collaboration
- Adaptability & Quick Learning
